

Run Buildship in Offline Mode

How to run Eclipse Gradle Buildship in offline mode.

Import Options

Specify optional import options to apply when importing and interacting with the Gradle project.

Gradle distribution

Gradle wrapper (recommended)
 Local installation directory
 Remote distribution location
 Specific Gradle version

Advanced options

Gradle user home directory
 Java home directory
 JVM options
 Program arguments

Click the Finish button to finish the wizard and start the import. Click the Next button to see a summary of the import configuration.
